Prvniho Pluku 14, Karlin , 18600, Prague, Czechia

About me: I'm a Full Stack developer currently in Czech Republic. I started my career in 2013 as a Web Designer and throughout the years I've also worked as Product Designer, Frontend Developer and most lately as a Full Stack in different projects and companies.

● WORK EXPERIENCE

18/08/2021 – CURRENT – Prague, Czechia
SOFTWARE DEVELOPER – INFOR

Responsible for developing an internal tool called HealthMonkey that helps our team automate DevOps processes.

My daily tasks usually consist of:

- Updating the UI Library with new components or improving the ones already developed
- Create plugins/pilets (we use Piral, which is a framework that allows us to use micro-frontends)
- Creating backend for the plugins using AWS services like Lambda, AppSync, Incognito

Technologies I usually use are, React + Typescript, Storybook, Python (backend), GraphQL and Serverless.

01/06/2020 – 01/08/2021 – Prague, Czechia
FULL STACK DEVELOPER – UNIGGARDIN

Uniggardin is a company that sells custom blinds/curtains. They are based in Denmark and the only selling channel is through e-commerce.

My responsibilities were:

- Developing a new iOS application with React and Ionic that is meant to improve the company workflow.
- Maintenance of our e-commerce website that is developed in Prestashop, bug fixing and adding new improvements.

uniggardin.dk | Prague, Czechia

01/06/2020 – CURRENT
FREELANCER

Mostly I sometimes take small projects to develop/maintain landing pages, small websites or hybrid applications (iOS/Android).

Some of my clients are:

- Spark Agency (now Magma Studio)
- Plug.events
- Uniggardin

I use a mix of tools to solve my clients problems, namely Wordpress, Vue.js, React, Ionic, etc. My main motivation to have freelancing jobs is to be able to try and use different tools and to help my customer succeed.

01/10/2019 – 01/06/2020

UX DESIGNER & FRONT END DEVELOPER – ALTITUDE SOFTWARE

Altitude was a company focused on selling software for contact centers. Since 2021 it was bought and it's part of Enghouse.

My responsibilities were:

- Designing mockups in Sketch for news products and features.
- Front End in React + Redux
- Maintaining the Altitude Design System both in Sketch and React
- A bit of C# when developing new API endpoints

01/09/2017 – 01/10/2019 – Lisboa, Portugal

PRODUCT DESIGNER – COMPTA

I was in the R&D department where we developed, mainly, applications for IoT. Since 2020 it was bought and now it's Future Compta.

Was responsible for designing mockups for new products and also new features. Worked closely with stakeholders and programmers to ensure every requirement was being filled.

Main activities:

- Adobe XD to design mockups and prototypes.
- Bit of bug fixing in Angular 1.5

01/08/2017 – 01/11/2017

FRONT END DEVELOPER – MAJ DIGITAL

MAJ is a startup focusing on providing awesome quality websites and products to their clients.

We were a team of 3, so did a bit of everything when needed but mainly:

- Developing Webapps in React + Redux and Wordpress (PHP).
- Design mockups with Adobe XD.
- Using Docker & Jenkins for CD/CI.

01/12/2015 – 01/08/2017

DIGITAL MARKETING SPECIALIST – ITEN

ITEN was a IT services company which did a bit of everything, from outsourcing to selling licensing. Since 2017 it was bought by Claranet.

I was part of the marketing team and my main activities were:

- Creation of Marketing campaigns.
- Management of digital channels, Adwords campaigns, optimization of SEO and SEM and creation of landing pages for PPC campaigns.
- Maintenance of the websites in the firm and development of new ones.
- Development of applications in PHP and React.
- Organizing and hosting corporate events.

01/06/2013 – 01/12/2015

WEBDESIGNER – COMPTA

Started as intern and was offered permanent contract after the internship ended.

I was in Services team supporting the marketing team and doing internal projects. Had some external projects in major telco companies in Portugal.

- Development of webapps in HTML5, SCSS / CSS3 & Javascript.
- Creation of Wordpress Themes.
- Graphic Design (Rollups, flyers, business cards and invitations)
- Consulting services on clients

● EDUCATION AND TRAINING

01/08/2017 – CURRENT – Lisboa, Portugal

BACHELOR IN COMPUTER SCIENCE AND ENGINEERING – Universidade Autonoma de Lisboa

Main programming languages used:

- C, Java, Python, Assembly, SQL, PL/SQL

Final project:

My final project was about predicting football odds. It consisted of grabbing the data from a bet website, parse it, put it through a machine learning model and try to figure out what the next odd would be, if it was going up or down or staying the same.

Was made with Docker, Python, HTML/CSS/JS and SQL.

The backend was built with Flask, it consisted of a REST API which offered the data already ready to be shown. We had some jobs that would run every 30m (grabbing new data, parsing, do the prediction) and the frontend was HTML, CSS and JS mainly.
